Profile

Backend and web developer with hands-on experience in Python, JavaScript, Node.js, Express.js, MongoDB and LangChain. Focused on building scalable applications, clean backend logic, and AI-powered workflows. Interested in system design, API development, and integrating Generative AI into real-world products.

Education

Bachelor of Engineering (AI & MI)

Jawaharlal Nehru New College Of Engineering

09/2024 – Present

Shimoga, Karnataka

Professional Experience

Freelance Web Developer

Indalnova 🔗

08/2025 – 11/2025

Remote/Kanpur, UP

- Designed and developed the company's official website using **HTML, CSS, JavaScript, Node.js, Express.js, MongoDB and Supabase**
- Manage and maintain the website, ensuring uptime, performance, and regular updates.
- Added new features and content as per client requirements.

Projects

EventHub – College Event Management Platform 🔗

03/2026 – Present

Node.js, Express.js, MongoDB, Mongoose, JWT, Joi

- Building a scalable backend system to manage college events, users, teams, and scheduling with role-based access control.
- **Architecture:** MVC pattern with modular structure, middleware-based validation, and centralized error handling
- **Impact:** Designed to support 1000+ users with efficient API performance and scalable database design

Hackathons & Competitions

- **Bug Bounty Event, Mysterio 6.0** - Secured 2nd prize and ₹2000 cash reward for identifying and exploiting security vulnerabilities.
- **Selected in Smart India Hackathon (SIH) – Internal College Round**, presenting a problem statement-based solution evaluated by faculty and mentors.
- **Hack Fest 1.0 (JNNCE):** Built and deployed *VeriVox AI*, an AI-powered system detecting real vs AI-generated voices using PyTorch, Whisper, and Gemini AI within 24 hours.
- **IGNITRON 2K25: National-Level Technical Fest** organized by **GM University**, where our team worked on an **AI-based solution for the education domain** in a competitive team environment.

Skills

Language

- Python, C, JavaScript, Java

Backend development

- Node.js, Express.js, MongoDB, Redis

Gen Ai

- LangChain

Tools

- Git, GitHub, Docker, VsCode
